Tab Manager Chrome Extension

This is a powerful and intuitive Chrome extension for managing your browser tabs. It helps you organize, search, and navigate your tabs efficiently, improving your productivity and browsing experience.

Features

- **Tab Organization**: Group and manage tabs by topic or task.
- **Quick Search**: Instantly find any open tab with a powerful search function.
- **Session Management**: Save and restore your browsing sessions.
- **Modern UI**: A clean and user-friendly interface built with Vue 3 and Vite.

Installation

1. Clone this repository.
2. Run `npm install` to install the dependencies.
3. Run `npm run build` to build the extension.
4. Open Chrome and go to `chrome://extensions/`.
5. Enable "Developer mode".
6. Click on "Load unpacked" and select the `dist` directory.

Usage

Click the extension icon in your Chrome toolbar to open the tab manager. From there, you can see all your open tabs, search for specific tabs, and group them as needed.

Development

To run the extension in development mode with hot-reloading:

```
npm run build-extension
```

This will watch for changes and automatically rebuild the extension.

Contributing

Contributions are welcome! Please feel free to submit a pull request or open an issue for any bugs or feature requests.
